### What is DADOquartz®?

Mined from the Southern African earth, DADOquartz® material is created by combining Quartz ore and other natural minerals. Quartz is a noble variety of silica which gives DADOquartz® its alluring and wellness characteristics.

DADOquartz® is eco-friendly and made in a sustainable responsible way. Our proprietary manufacturing method takes place under extreme pressure and vacuum. Together with superior resins and a higher concentration of quartz, we have created a 100% solid cast-stone material that will last a lifetime. 'THE WORLD'S MOST LUXURIOUS BATHTUB MATERIAL'.

### Quality

Tried and tested for over two decades, only the finest and purest natural ingredients with a high Quartz component are used to manufacture our DADOquartz® material, using state-of-the-art robotics together with handcrafting. DADOquartz® has set the benchmark in bathtub excellence.

Because our material is 100% non-porous and solid throughout, we do not need to apply a topcoat to the surface of our products to hide imperfections. This way, we guarantee you a superior and hygienic bathtub that will never fade or yellow. Our industry-leading lifetime warranty is a promise you can trust.

### Style And Wellness

The bathtub is the most intimate and personal part of your bathroom. Your own private sanctuary.

DADOquartz® bathtubs strive to awaken and enhance these emotions and to promote your wellbeing. Our bathtubs and basins have been selected by the most experienced and skilled Architects and Designers, from all around the world, whom we listen to and learn from.

Our expert in-house design team is able to translate and bring these concepts to life. Using state-of-the-art technology, we produce our very own molds, which allow us a significant advantage in turnaround cost and time in a highly stringent international market. Our ability to customize is unparalleled and often the integral part of many projects. Our objective is for each design to be a "Future Classic".

### Functionality

We firmly believe that for our exquisite designs to become "Future Classics", they must be functional. We achieve a high level of comfort through our DADOquartz® material that is warm to the touch, retains heat well and is shaped to provide optimum support.

We have designed the drain position to allow for an extended seating area. The satin-smooth finish of our bathtubs is gentle on the skin, while remaining exceptionally strong. We maintain an exceptional standard of hygiene with our DADOquartz® non-porous material that is resistant to bacteria, mold and is easy to clean.

We are able to achieve Easy Installation and Cost Savings by eliminating the need for overflow drains and providing a unique plumber's space which allows for simple installation options. Our bathtubs are easy to install as they conveniently weigh only about the weight of a person.
