Flowerday Design22

Salo Art Design strives to provide the highest quality kitchen hardware while offering a wide variety of pricing and design options.

Verona Bronze
Original designs are a tribute to the Valle Sabbia region in Northern Italy near Brescia, and these products pay homage to the ancient craft and history of working with Bronze and its alloys. Bronze represents the start of an evolutionary age in human development 5000 years ago, via the skill of metalwork.

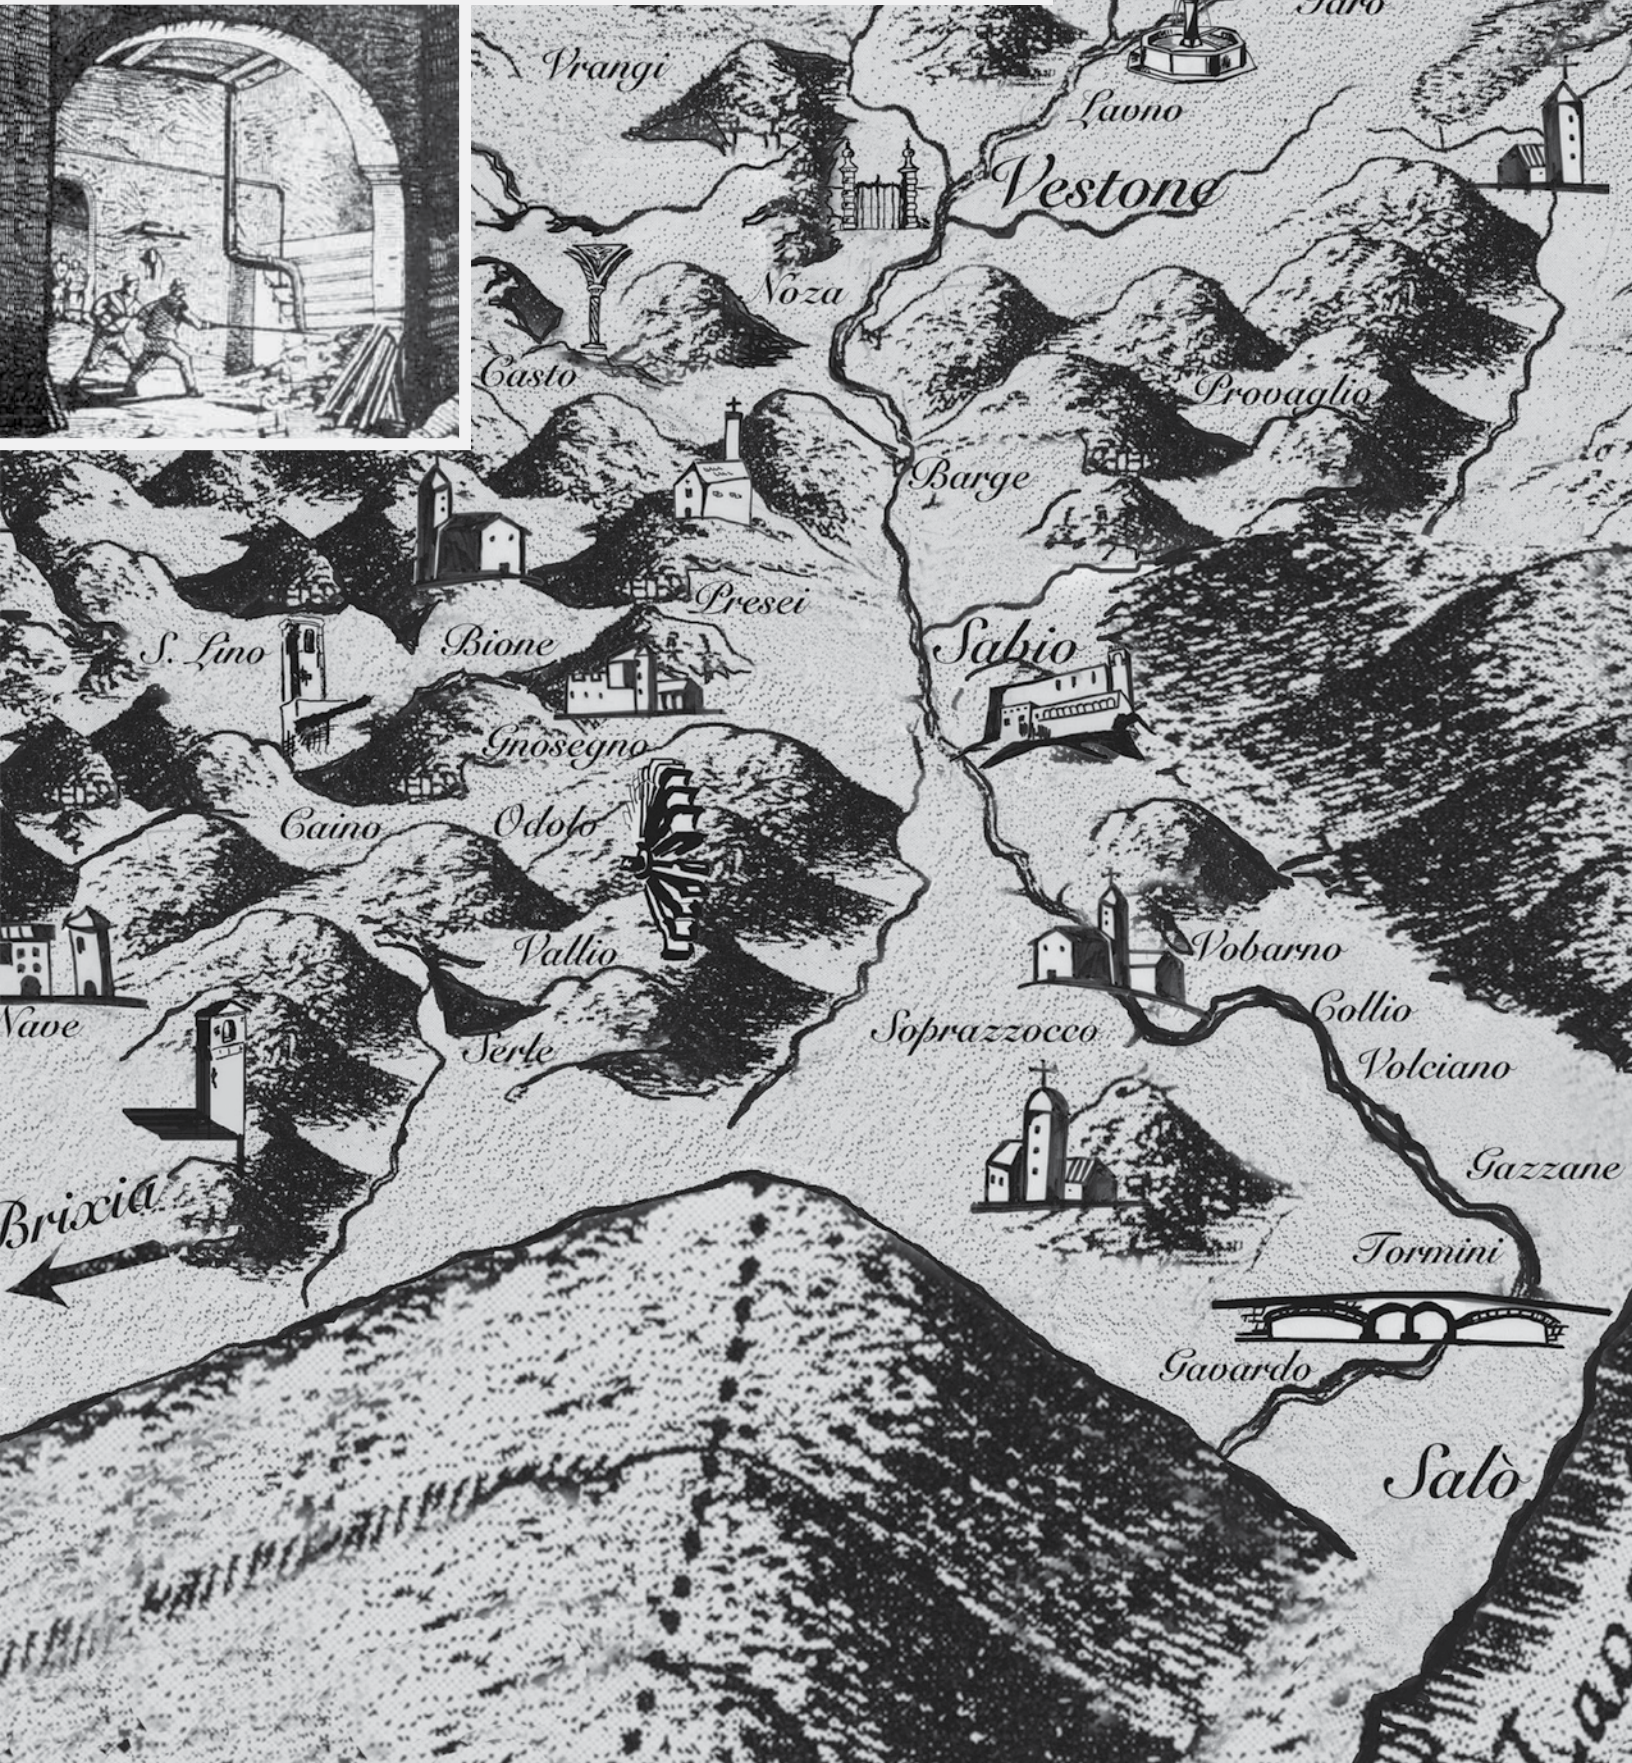

These collections are the union of art, craft, history and passion from Italian artisans. Verona Bronze presents a range of handles in traditional bronze-metal finishes by contemporary designers.

Visturo Designs
These latest contemporary pieces from Northern Italy are designed and manufactured in the region north of Milan and south of Lake Como. They have interesting contours and shapes with multiple lengths and consistent, durable finishes.

Flowerday Design
Thoughtful, unique Kitchen and Furniture Hardware from a legendary American Designer.

The art of Bronze casting exists in our valley by about four thousand years. Recent archaeological investigations conducted in a small village in the middle of Sabbia Valley, on the Corna Nibbia mountain, show traces of molds in terracotta, bronze fusion slags and hand crafted bronze artifacts as evidence of metallurgical activity dating back to 1,800 BC. You can admire these precious artifacts at the Archaeological Museum of the Sabbia Valley in Gavardo named “The Man and Metal though the centuries”.

SALÒ ART DESIGN HEADQUARTERS
