ACCLAIM FOG-FREE MIRROR

Brilliant Products
that combine fashion,
form and function.

NORTHSTAR WATERPROOF TV

FUSION WARDROBE MIRROR

INTEGRITY LIGHTED MIRROR

Our lighted mirrors are as much a fashion statement as they are a representation of flawless functionality. Here, bold design strikes a balance with intelligent technology to create a mirrored centerpiece that unites captivating aesthetics with twenty-first century style.

ECLIPSE TV COVER

Innovative Technology that sets the industry standard.

Mirror Glass

DURAMIRROR: Unlike inferior imported mirrors, our DuraMirror™ technology resists unsightly clouding, desilvering and black-spot corrosion caused by the high humidity and poor ventilation common in most bathrooms.

SPECTRUM: Spectrum™ mirrors have a highly reflective mirror surface and provide a good TV image when turned on. When the TV is off, the screen area is camouflaged, leaving only a light gray image where the TV is located.

B-SERIES: Ideal for all-white or brightly colored bathrooms, B-Series™ is a custom option that provides a crisp, clear viewing experience with reduced glare.

IRIS: Iris® mirror, used on our Eclipse™ TV Cover, offers stunning quality, reduced glare, and a TV viewing experience equal with a standard HDTV.

LED Lighting

Our dimmable, replaceable, energy-saving LEDs raise the bar on quality, color, and brightness. Since we know a bright, warm color is generally most flattering, we designed our mirrors with the standard light temperature of 3000K.

Dimming

Control your mirror's brightness and enhance your room ambiance with advanced dimming technology, available in lighted mirrors, mirror TVs, mirrored cabinets, and wardrobe mirrors.

Keen Technology

Bring the Silhouette™ Lighted Mirror and Ascension™ Mirrored Cabinet to life with the beauty and functionality of Keen™, which offers intelligent dimming, eco-friendly technology, and Night Glow with a touch.

Ava Technology

Ava™ takes task lighting to a beautiful new level, letting you change the LED light color and brightness level to make precise makeup application possible.

TV Technology

BATHROOM MIRROR TVs: We offer four bathroom-mirror TV styles. Each one comes with a waterproof remote, offers a choice of a 15.6" or 21.5" TV, and a choice of mirror glass technology.

WATERPROOF TVs: Engineered specifically to perform in humid bathrooms and wet kitchen environments, the Northstar® Waterproof TV is as practical as it is beautiful.

TV COVERS: The Eclipse™ TV Cover instantly transforms your existing flat-screen TV into a beautiful mirror, making your room feel larger and more luxurious. When the TV is on, the Iris® mirror glass ensures a premium viewing experience with a bright image and reduced glare. When the TV is off, Eclipse becomes a sleek and modern mirror.
