Hotel luxury for the Home™

INTRODUCTION

- 6 Our Story
- 10 Our Lookbook

Hotel luxury for the Home™

In 1997, we introduced our mirrors to the luxury hotel industry. In no time, prestigious hotels and resorts around the world began integrating Electric Mirror products into guest rooms to the delight of their most discerning customers.

As our reputation grew, so too did our product portfolio. From lighted mirrors, makeup mirrors, and mirrored cabinets to wardrobe mirrors, fog-free mirrors, and mirror TVs, we've created captivating products that can transform virtually any space.

Across all decor styles, from elegant to refined, the world's premier 5-star hotels choose Electric Mirror products to help create exceptional guest experiences.

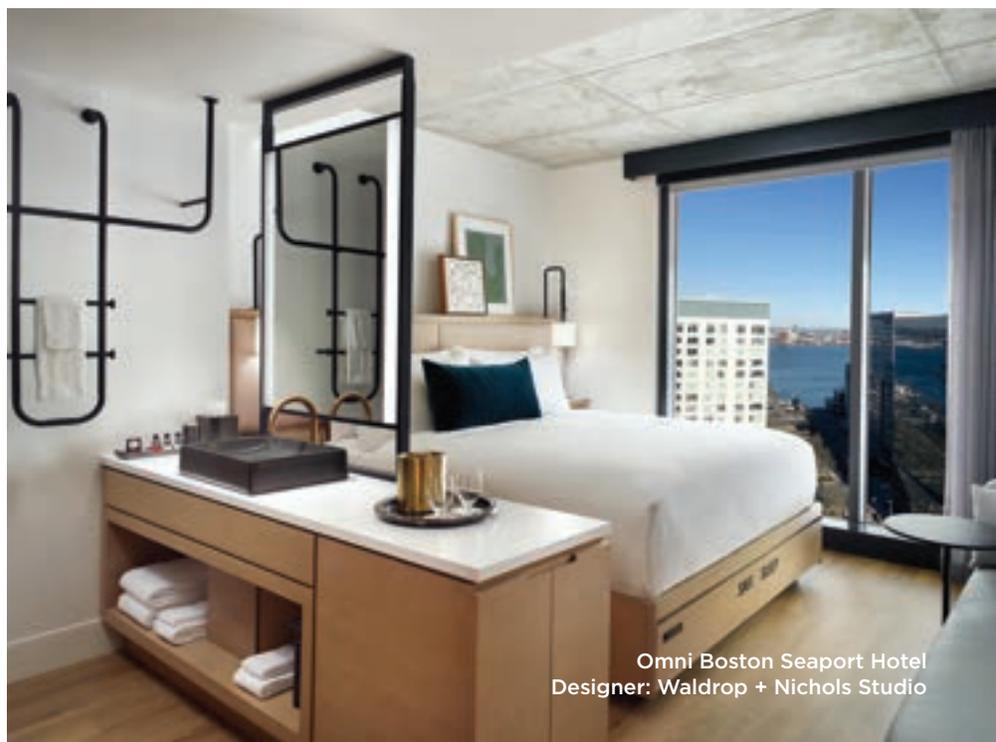

Bellagio Hotel, Las Vegas
Designer: The Gettys Group

Burj Al Arab Hotel, UAE

One&Only The Palm, Dubai

Omni Boston Seaport Hotel

Electric Mirror World Headquarters
Everett, WA

Electric Mirror Manufacturing Facility

Electric Mirror Final Assembly

As demand for our products has grown, our manufacturing capabilities have kept pace. What started in a family garage with a workforce of five is now a 125,000-square-foot American manufacturing facility with hundreds of employees.

Electric Mirror products are now enjoyed by millions of people every day. Our passion to create products that unite timeless design, innovative technology, exceptional quality, and unparalleled value has led to unsurpassed customer satisfaction.

With 25 industry awards for excellence and 66 patents for innovation, our products are considered the best the world has to offer. Now, you can choose these same products featured in the world's most exclusive hotels and create your own 5-star luxury experience at home.

Electric Mirror Mirror Processing

Silhouette™ Lighted Mirror

An illusion of free-floating reflection merges seamlessly with resplendent light to create the perfect Silhouette™. With practical task lighting and soft wall glow, this beautiful lighted mirror will illuminate your room in blissful splendor.

Blissful

Striking

Fusion™ Lighted Mirror TV

The ideal Fusion™ comes from a striking combination of clean, strong lines and efficient, natural-looking LED lighting—adding a distinctly modern statement of prestige to your bathroom.

Tailored

Integrity™ Lighted Mirror

Add glimmering light and tailored grace to any space with a powerful impression of Integrity™. Featuring a brilliant inner frame of frosted light, this radiant marvel is as stylish as it is functional.

Eminence™ Lighted Mirror

This lighted mirror has risen to a place of Eminence™, bringing distinction to every room it graces. A unique shadow-box frame, inward-facing task lighting, and ambient wall glow combine to create an elegant balance of form and function.

Elegant

Eclipse™ TV Cover

This exclusive TV cover will Eclipse™ all expectations as it transforms your flat-screen TV into a sleek mirror, providing a clear image when the TV is on, and making it vanish when turned off.

Sumptuous

Integrity™ Wardrobe Mirror

The Integrity™ of precise, geometric lines creates a sumptuous pièce de résistance that provides a full illuminated reflection, adding prestige to any dressing room.

Eminence™ Lighted Mirror

The juxtaposition of a stunning frame adorned with dimmable task lighting and dimmable ambient wall-glow creates a breathtaking focal point of Eminence™ for any room.

Breathtaking

Refreshing

Hampton™ Custom Lighted Mirror

Give any room a refreshing new look with a custom-designed lighted mirror from Electric Mirror. From unique mirror shapes to novel light patterns, if you can dream it, we can build it.

Captivating

Ambiance™ Mirrored Cabinet

Add Ambiance™ to your bathroom and create a captivating look with real-world functionality. Featuring a bold frame of lustrous light, it's an ideal match for contemporary décor.

Brilliance™ Lighted Mirror

Combining a timeless, balanced shape with both task and ambient lighting is sheer Brilliance™. The front-lit design of this modern mirror, available in brushed brass and matte black, elevates task lighting to a level never before seen.

Timeless

Quad Fusion™ Custom Lighted Mirror

With a balanced Fusion™ of two sets of brilliant lights, this mirror not only delivers a smart solution for dual-sink vanities, it also complements and extends the aesthetic design of a dual shower.

Smart

Harmonious

Elixir™ Makeup Mirror

The beautiful styling of this makeup mirror creates the perfect Elixir™ for a magnified reflection, and offers a harmonious complement to our Element™ lighted mirror, also featured.

Enticing

Acclaim™ Fog-Free Mirror

To the Acclaim™ of architects and designers alike, we merged an enticing design, natural-looking LED lighting, and a highly versatile built-in defogger, revolutionizing the shower experience.

Luna™ Lighted Mirror

Just as the Luna™ creates an ethereal solar eclipse, the spectacular presence and beautiful ambient glow of this lighted mirror illuminates your atmosphere with magnificent splendor.

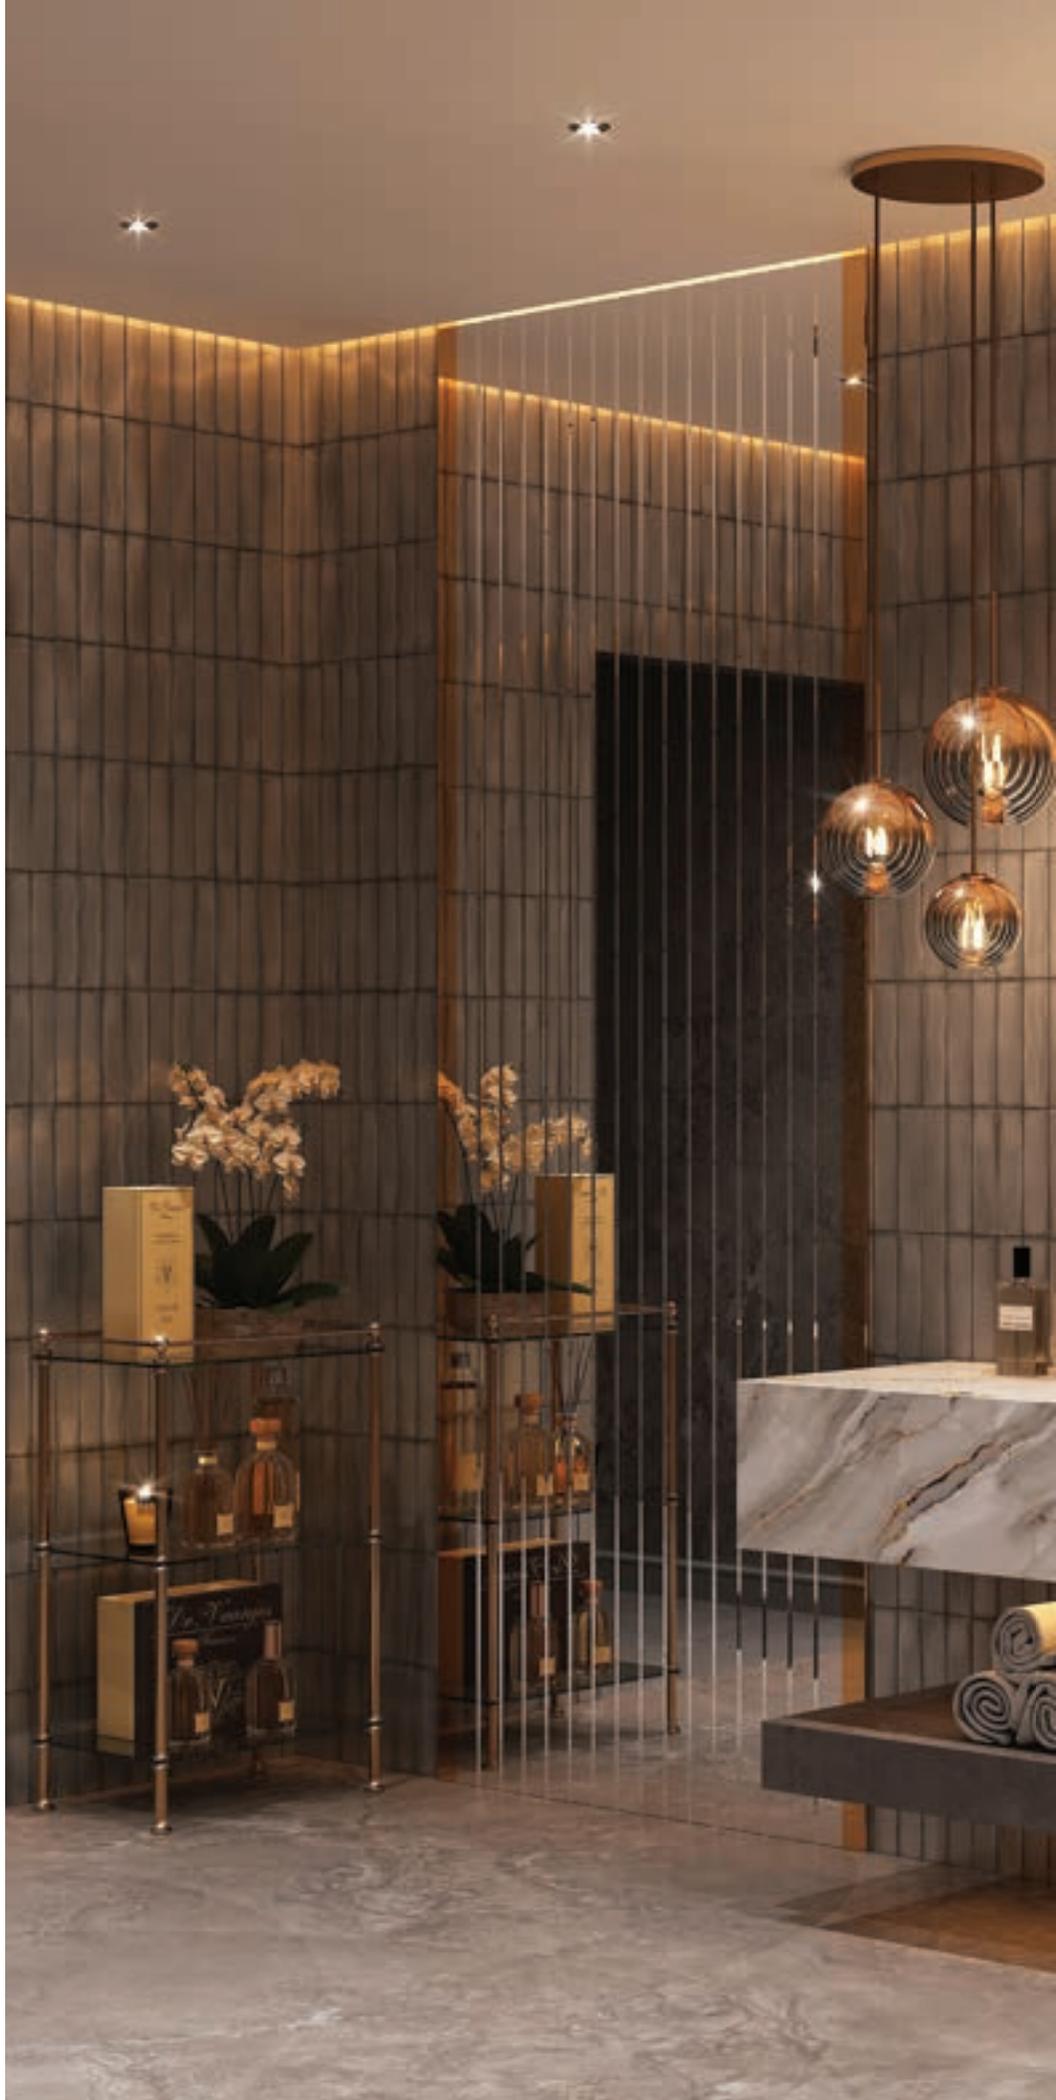

Ethereal

Novo™ Lighted Mirror

A de Novo™ alternative to bathroom sconces, this mirror pairs glimmering illumination with ultra-soft wall glow, forming a harmonious combination of task and ambiance lighting.

Barcelona™ Lighted Mirror

This stunning lighted mirror features a gorgeous mosaic border of mother of pearl, the iridescent lining of oyster and abalone shells. Each shell is harvested, cut, and polished by hand, as is the entire mosaic border, so no two mirrors are alike. Accented by a sleek, minimalist gunmetal gray metal frame that brings out the beauty of the shells, each hand-crafted mirror is a true work of art.

FEATURES AND BENEFITS

- Lead-free, copper-free, corrosion-resistant OmegaMirror™
- Forward-facing task lighting
- Forward-phase dimming technology
- Ava™ model stores brightness and CCT settings
- Suitable for damp bathroom environments
- Environmentally sustainable
- Energy efficient
- Fast lead times
- Easy installation
- ADA compliant
- Title 24 compliant
- 7-year limited warranty
- Patent: www.electricmirror.com/patents
- Made in America with U.S. and global components

AVAILABLE OPTIONS

- Ava™ Technology (upgrade)²
- Defogger
- Custom sizes¹

LIGHTING SPECIFICATIONS

- Natural-looking LED light color
- CRI: 90+
- CCT: 3,000K
- CCT: 2,700K / 3,000K / 3,500K / 4,000K / 5,000K color rotation (with Ava™)
- Replaceable LEDs
- 604 initial lumens/foot (standard)
- 533 initial lumens/foot (with Ava™)
- Maximum 100 lumens/watt efficacy
- Calculated L₇₀ 124,000-hour LED lifespan

SAFETY SPECIFICATIONS

- Entire assembly meets UL/cUL standards
- International certifications
- Safety-backed mirror

INSTALLATION SPECIFICATIONS

- 120V-240V hardwire electrical connection; provide 36" whip; junction box not required
- Chassis should be mounted to wall studs; mounting holes are provided
- Standard model controlled by forward-phase dimming wall switch
- Ava™ model controlled by capacitive touch button on fixture or non-dimming on/off wall switch
- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable

¹Standard model numbers shown. For additional options, see page 154 or contact residential@electricmirror.com.

Frequently Asked Questions for Lighted Mirrors

WHAT IS THE BRIGHTEST LIGHTED MIRROR?

Our collection of front-lit mirrors, which include the Brilliance™, the Eminence™, and the Radiance™, are the brightest mirrors for task lighting due to their inward directional lighting that illuminates the face. Among our traditional back lit mirrors, the larger Aria™ and Integrity™ lighted mirrors offer the brightest lighting. The Eyla™ and Silhouette™ lighted mirrors emit a similar amount of light, but much of that light is directed towards the wall for wall glow, resulting in softer task lighting.

CAN A LIGHTED MIRROR BE THE ONLY SOURCE OF LIGHT IN A BATHROOM?

We recommend having overhead lighting in addition to lighted mirrors to create ideal conditions.

HOW DO I MOUNT A LIGHTED MIRROR TO THE WALL?

Lighted mirrors (other than the Brilliance™, Eminence™ and Radiance™—see below) include two components: a metal chassis and a mirror face. To mount the chassis, use the provided mounting holes near the corners of the chassis to secure it to a structurally sound surface, such as wall studs. After the chassis is mounted and hardwired, hang the mirror face on the front of the chassis.

HOW DO I MOUNT THE BRILLIANCE™, EMINENCE™, AND RADIANCE™ TO THE WALL?

First, mount the included wall cleat to the wall, using the provided mounting holes to secure it to a structurally sound surface, such as wall studs. With the Radiance™, a separate power box is mounted to the wall. Then, connect the wiring and hang the fixture on the cleat.

CAN A LIGHTED MIRROR BE MOUNTED IN ANY ORIENTATION?

No, the lighted mirror must be installed in the orientation listed (width x height) as the mirror hangs on a chassis or wall cleat. Contact us for a quote if a custom size is required; see page 154 for details.

CAN A LIGHTED MIRROR BE MOUNTED ALL THE WAY TO THE CEILING?

No, the lighted mirrors require at least 1 inch clearance at the top to allow space for the mirror to lift on and off of the metal chassis or wall cleat. See Element™ and Elite™ for ceiling-mounted mirrors.

CAN THE LIGHTED MIRRORS BE RECESSED FLUSH WITH THE WALL?

Lighted mirrors are typically meant to be surface mounted. To recess an Eternity™, Fusion™, or Integrity™ lighted mirror, ensure that the 1/4" mirror is proud of the wall and just the chassis is partially recessed. Make sure to leave a 1" clearance above the glass so the mirror can lift up for installation and maintenance.

WHAT POWER IS NEEDED FOR MOST LIGHTED MIRRORS?

Most lighted mirrors come ready to hardwire for 120V-240V. The power whip should come through the back of the unit for the hardwire connection. A 36" long power whip can be prepared 12" down from the top of the mirror and centered from left to right. A quick disconnect is included so the wires can easily be connected. No J-Box is required for most fixtures (see Brilliance™ and Eminence™ below).

WHAT POWER IS NEEDED FOR THE BRILLIANCE™, EMINENCE™, AND RADIANCE™?

These lighted mirrors come ready to hardwire for 120V. For Brilliance™ and Eminence™ a J-Box is required. Radiance™ does not require a J-Box. Power will enter through knockout of provided enclosure. See Installation Instructions for specific locations.

CAN THE LIGHTS BE REPLACED?

Depending on the lighted mirror our LEDs have calculated or reported L₇₀ lifespans from 50,000 to 140,000 hours so they will likely not need to be replaced for many years; however, they are designed to be replaceable on most units.

CAN ANY LIGHTED PRODUCT BE UPGRADED WITH AVA™ OR KEEN™?

Ava™ and Keen™ technologies are available on many of our products, as indicated throughout this book; however they cannot be added to products where they are not listed as options.

QUESTIONS?

Call 888.368.1285.

Refined

MIRROR TVS

Fusion™ Lighted Mirror TV

This high-tech, high-style Fusion™ is defined by clean lines, efficient natural-looking LED lighting, and an ultra-sharp LED HD display—ideal for adding a definitive statement of prestige to any bathroom.

Frequently Asked Questions for Mirror TVs

ARE SPEAKERS INCLUDED, AND CAN I USE MY OWN SPEAKERS?

Yes, our TVs include integrated speakers. They're also compatible with most third-party external speakers.

WHAT IS THE WARRANTY ON THE TV AND HOW DO I SERVICE THE TV?

We offer an industry leading three-year warranty for the TV. Should an issue occur within the warranty period, we'll either repair or replace the TV. The TV can easily be swapped from the TV bracket on the back of the mirror using a Phillips screwdriver.

CAN THE TV BE INTEGRATED WITH A HOME AUTOMATION SYSTEM?

Yes, our TV includes IR in and IR out (3.5mm jacks) for communication with home automation systems. Request our IR codes by emailing customer.support@electricmirror.com. RS-232 control is available for special order, contact us for quotation.

DO I NEED A SEPARATE CABLE BOX?

Yes. Our TV does not include a tuner. An LG set-top box or broadcast cable box is recommended. Contact our Technical Support team if using another brand set-top box. Without a set-top or cable box, our TV acts as a display with provided video signal over HDMI.

DO I NEED A SEPARATE REMOTE CONTROL?

It depends on your set-top box. When using an LG set-top box, our remote control is all that is required. If using a broadcast cable box, typically their remote control can be programmed with our IR codes and can be used in place of our remote. Contact Technical Support if using another brand set-top box.

HOW DO I MOUNT A LIGHTED MIRROR TV?

First, review the chassis and mirror, noting the location of the TV, defoggers, speakers, hanger, or other mirror components. Then, recess a power outlet (so the TV can plug in for power and any audio/video connections needed) behind the mirror in a location that does not interfere with any of the components. Next, mount the chassis to the wall. Finally, hang the mirror TV on the chassis. Consult the installation guide for more details.

HOW DO I MOUNT A NON-LIT MIRROR TV?

First, recess a power outlet behind the mirror so the TV can plug in for power and any audio/video connections needed. Make sure the outlet does not interfere with the hanger on the mirror or the area behind it. Then, mount the metal wall cleat to the wall. Finally, hang the mirror TV on the wall cleat. Consult the installation guide for more details.

Frequently Asked Questions for Mirrored Cabinets

HOW CAN THE MİRRORED CABINETS BE DIMMED?

The Ambiance™ can be dimmed with a forward-phase dimming switch. This requires a 120V unswitched hardwire connection to the cabinet, plus a set of wires from the cabinet to a forward-phase dimming switch (Leviton IPL06-10Z or Lutron DVCL-153P or equivalent; not provided).

The Ascension™ includes Touch Dimming technology for dimming the lights.

HOW DO THE DEFOGGER AND INTERNAL LIGHT WORK?

The Ambiance™ and Ascension™ include a defogger and automatic internal top light. The defogger is controlled by an internal button and the top light is controlled automatically by a PIR sensor.

WHAT ARE THE POWER SPECIFICATIONS FOR MİRRORED CABINETS?

Bring a 120V unswitched 20 Amp GFCI-protected circuit through the bottom back of the cabinet. For the Ambiance™, run a second circuit from the cabinet to a forward-phase dimming wall switch. For the Ascension™, run a second circuit from the cabinet to an on/off wall switch. Refer to the installation instructions for further details and options..

CAN I RECESS MOUNT MY MİRRORED CABINET?

Yes, each cabinet comes ready for recess mounting. Measure the cabinet body for framed rough-in dimensions.

CAN I SURFACE MOUNT MY MİRRORED CABINET?

Yes, all cabinets include a surface-mount bracket and side mirrors, and have the option to be surface mounted or recessed.

HOW DO I INSTALL TWO OR MORE MİRRORED CABINETS SIDE BY SIDE?

Make sure there is a minimum 1/8" space between each cabinet to ensure proper clearance for the doors to open. Use the Ganging Kit upgrade to install two recessed cabinets side by side with a 1/8" gap between the doors. When recessing three or more cabinets, include a 1" wood strip between each and add 1" to the rough-in width for the space between each cabinet.

Model #s:

KIT-GANG-30-OS-04 for 30" high cabinets - \$50 retail
KIT-GANG-36-OS-04 for 36" high cabinets: - \$50 retail
KIT-GANG-40-OS-04 for 40" high cabinets - \$50 retail

Freight is \$10 each.

CAN I INSTALL A MİRRORED CABINET SIDE BY SIDE WITH A LIGHTED MIRROR?

Yes, however, the depths may vary, and there is no Ganging Kit for the different product types.

HOW FAR DOES THE DOOR SWING OPEN?

The door opens up to a 140° angle.

Frequently Asked Questions for Makeup Mirrors

WHAT MAGNIFICATIONS ARE AVAILABLE?

All models offer 5X magnification. The Charm™ offers 5X magnification on one side, with a standard reflection on the other side.

WHAT FINISHES ARE AVAILABLE?

We offer Polished Stainless Steel, Brushed Stainless Steel, and Matte Black finishes; the availability of finishes varies by model. We cannot offer custom finishes or any customization to the makeup mirrors.

ARE ANY MAKEUP MIRRORS DOUBLE SIDED?

The Charm™ makeup mirror is double-sided, with 5X magnification on one side and a standard mirror reflection on the other. All other models only have the magnified mirror on one side, with a back side of finished metal.

DO THE WALL MOUNTED MAKEUP MIRRORS HAVE AN ARTICULATED ARM?

Yes, they have an articulating arm that can fold in towards itself, maximizing space when not in use.

DO THE MIRRORS HAVE THE ABILITY TO TILT AND PIVOT?

Yes, all mirrors can tilt up-and-down, as well as pivot side-to-side.

FEATURES AND BENEFITS

- Lead-free, copper-free, corrosion-resistant OmegaMirror™
- One-touch dimmable forward-facing task lighting for brilliant facial illumination
- Mirrored interior with automatic top light
- Adjustable glass shelves
- Two (2) electrical outlets with two (2) USB Type-A ports inside cabinet
- Magnetic strip inside cabinet for small personal grooming tools
- Wide 140° door opening for optimized usage
- Edge-guard protective trim around entire mirror door
- Soft close, adjustable damping, quiet landing, and fast close hinges
- Easy-mount hinge system for simple installation
- Can be recessed or surface-mounted (side panel mirror kit included)
- Suitable for damp bathroom environments
- Environmentally sustainable

- Energy efficient
- Easy installation
- ADA compliant
- 3-year limited warranty
- Patent: www.electricmirror.com/patents
- Designed in the USA

AVAILABLE OPTIONS

- Right or left door swing

LIGHTING SPECIFICATIONS

- Natural-looking LED light color
- CRI: 90+
- CCT: 3,000K
- 516 initial lumens/foot
- Maximum 96 lumens/watt efficacy
- Calculated L₇₀ 50,000-hour LED lifespan

SAFETY SPECIFICATIONS

- Entire assembly meets UL/cUL standards
- Safety-backed mirror

INSTALLATION SPECIFICATIONS

- 120V hardwire electrical connection; provide two 12" whips; junction box not required; interior receptacle requires unswitched 20 Amp GFCI protected circuit; cabinet lighting should be wired to a switched circuit; refer to installation instructions for further details and options
- Fixture should be mounted to wall studs; wall cleat provided
- Cabinet can be recess-mounted to wall studs; mounting holes are provided
- Controlled by non-dimming wall switch for on/off, and capacitive touch button on fixture for dimming
- Internal top light controlled by internal PIR sensor
- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable

Eminence™ Lighted Wardrobe Mirror

This lighted wardrobe mirror has attained Eminence™ among designers, bringing prestige and distinction to every room it graces. A unique shadow-box frame, inward-facing task lighting, and ambient wall glow combine to create a perfect balance of form and function.

		BASE MODEL

Frequently Asked Questions for Wardrobe Mirrors

WHERE CAN A WARDROBE MIRROR BE INSTALLED?

A wardrobe mirror can be installed in just about any room of the house. The typical locations include the bedroom, walk-in closet, hallway, and even the bathroom as long as it is at least 3' away from the tub or shower.

HOW DO I MOUNT THE WARDROBE MIRROR TO THE WALL?

Please see the installation instructions as the method varies per product.

CAN A WARDROBE MIRROR BE MOUNTED IN ANY ORIENTATION?

No, the wardrobe mirror must be installed in the orientation listed (width x height).

CAN THE TOP OF A WARDROBE MIRROR BE MOUNTED ALL THE WAY TO THE CEILING?

No, wardrobe mirrors require at least 1 inch clearance at the top to allow space for the mirror.

CAN WARDROBE MIRRORS BE RECESSED FLUSH WITH THE WALL?

Wardrobe mirrors are meant to be surface mounted; however, some can be recessed such as Ascension™, Fusion™, Integrity™ and Saratoga™. To recess a wardrobe mirror, ensure that the 1/4" mirror is proud of the wall and just the chassis is partially recessed. Make sure to leave a 1" clearance above the glass so the mirror can lift up for installation and maintenance.

WHAT IS NEEDED FOR POWER?

Please see the installation instructions as different models require different wiring methods.

CAN THE LIGHTS BE DIMMED?

Eminence™ and wardrobe mirrors with Ava™ (page 168) can be dimmed by touching and holding the capacitive touch control located on the mirror face. Wardrobe mirrors without Ava™ can be dimmed with a forward-phase dimming switch (not included).

CAN THE LIGHTS BE REPLACED?

The LEDs have a calculated $L_{70} \geq 50,000$ -hour lifespan and will not likely need to be replaced for many years; however, they can be replaced.

- Defogger controlled by on/off wall switch
- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable

Frequently Asked Questions for Fog-Free Mirrors

DOES THE ENTIRE MIRROR REMAIN FOG-FREE?

These mirrors have a defogger in the center of mirror that is 6" x 8" on the small size, and 6" x 11" on the large size. While the majority of the mirror will not fog up, expect to see fog form around the perimeter of the mirror.

CAN I TURN THE FOG-FREE MIRROR ON AT THE SAME TIME AS THE SHOWER?

We recommend a minimum five-minute warm-up period. These are low-voltage units so they are safe in the shower, but that means they need some time to warm up before the shower is turned on.

CAN A FOG-FREE MIRROR BE INSTALLED IN A STEAM SHOWER?

Yes, however, the mirror is more likely to fog up due to intense steam. This product is better suited for a typical shower.

HOW IS IT WIRED AND WHERE SHOULD THE TRANSFORMER BE PLACED?

These mirrors come ready to hardwire for 120V. They include a transformer and 25' low-voltage cable. The transformer should be installed in a dry, accessible location like a closet, and can be controlled by a light switch in the bathroom or a timer.

HOW SHOULD FOG-FREE MIRRORS BE MOUNTED TO THE SHOWER WALL?

The Acclaim™ must be recessed into the wall; the Aqua™ must be surface mounted to the drywall. For both products, the mirror surface must be flush with the shower's finished surface (e.g. tile, marble, etc.) surrounding the mirror. Do not install products on top of the finished surface, as this leaves the mirror edges exposed. Once installed, it's important to seal around all mirror edges by applying a silicone sealant (not included) to the joint between the mirror and the shower surface. This will help protect the mirror edges from damage over time.

WHAT ADHESIVE DO YOU RECOMMEND FOR INSTALLING THE AQUA™ FOG-FREE MIRROR?

For the non-lighted Aqua™, adhere the mirror defogger to the wall using a mirror mastic or tile adhesive (not included) around the back edges of the mirror. Once adhered to the wall, make sure to silicone around the perimeter.

FEATURES AND BENEFITS

- Glare-resistant Iris® mirror glass
- Fast lead times
- Quick and easy to install over existing flat-screen TVs
- Universal design fits virtually all flat-screen TVs
- 3-year limited warranty
- Patent: www.electricmirror.com/patents
- Made in America with U.S. and global components

TV FEATURES AND BENEFITS

- Easy-fit TV mounting solution

FINISH

- Brushed Black finish

INSTALLATION SPECIFICATIONS

- Eclipse™ is designed to mount over flat-screen TVs built from 2013 to present
- Eclipse™ is not compatible with curved or tabletop TVs
- Existing flat-screen TV must be installed on a VESA wall mount (VESA mount not included)
- Eclipse™ is attached to existing VESA wall mount using included hardware

Frequently Asked Questions for TV Covers

HOW DO I KNOW WHAT SIZE TO ORDER?

Eclipse™ comes in the following sizes:
32", 43", 55", 65" and 75".

The 32" Eclipse will fit a 32" diagonal flat-screen TV.

The 43" Eclipse will fit a 40" to 43" diagonal flat-screen TV.

The 55" Eclipse will fit a 48" to 55" diagonal flat-screen TV.

The 65" Eclipse will fit a 58" to 65" diagonal flat-screen TV.

The 75" Eclipse will fit a 75" diagonal flat-screen TV.

HOW CLOSELY WILL THE ECLIPSE MATCH MY TV SIZE?

Eclipse is available in five sizes. Note that as the difference in size between the TV and Eclipse increases, so too does the potential to notice the space between the outer edge of the TV and the inner edge of the Eclipse through the mirror glass.

ARE THERE MAXIMUM WEIGHT LIMITS WITH THE ECLIPSE?

Yes, make sure to check the wall mount's maximum weight limit. Total installed weight is calculated by adding the TV weight to the appropriate Eclipse weight (below).

HOW MUCH DOES AN ECLIPSE WEIGH?

The 32" Eclipse weighs approximately 20 lbs.
The 43" Eclipse weighs approximately 27 lbs.
The 55" Eclipse weighs approximately 37 lbs.
The 65" Eclipse weighs approximately 47 lbs.
The 75" Eclipse weighs approximately 58 lbs.

WILL MY IR REMOTE CONTROL WORK THROUGH THE GLASS OF THE ECLIPSE?

Yes, any standard IR signal will transmit through our high-quality Iris® glass.

DOES THE ECLIPSE WORK WITH TABLE-TOP FLAT-SCREEN TVS?

No, the Eclipse is only compatible with flat-screen wall-mounted TVs made from 2013 to present.

HOW DO I INSTALL THE ECLIPSE?

First, lay the Eclipse flat on a stable and cushioned surface, such as carpet or a towel. Next, lay the TV flat over the Eclipse to properly adjust the included brackets to fit the TV. Then, mount the TV to the wall and hang the Eclipse TV cover over the wall-mounted TV.

WHAT TYPE OF TV SHOULD I USE?

The Eclipse TV cover should be used with a high bright display with 2000+ nits. TVs without sufficient brightness may have reflective glare when located near natural lighting.

Lighted Mirror Technology

From mirrors made specifically for bathrooms, to vanishing mirrors engineered to optimize mirror technology, our mirror transcends all expectations.

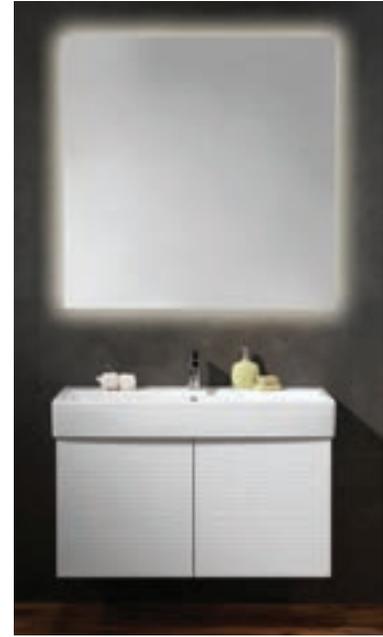

BACK-LIT MIRROR WITH TASK LIGHTING

Designed to maximize direct, forward-facing illumination, this style is ideal for precision tasks such as makeup application and shaving. The fixture includes a white powder-coated chassis for a finished side view, with LED lights that are installed on the interior, directing light forward through the frosted areas of the mirror surface. Back-lit mirrors with an enclosed chassis include the Aria™ (page 44); the Barcelona™ (page 46); the Bela™ (page 48); the Element™ (page 52); the Elite™ (page 54); the Eternity™ (page 58), the Fusion™ (page 62); the Integrity™ (page 64); and the Saratoga™ (page 72).

BACK-LIT MIRROR WITH TASK LIGHTING AND WALL GLOW

With this style, the LEDs are installed with diffusers on the outside of the chassis for a finished side view, providing both forward-facing task lighting and a soft halo of light glowing around the perimeter of the mirror for added room ambiance. Since this style allows light to emanate from the sides, the forward-facing task lighting may be perceived as less bright than that of an enclosed chassis. Back-lit mirrors with both task lighting and wall glow include the Eyla™ (page 60); the Novo™ (page 68); the Silhouette™ (page 76), and the Trinity™ (page 78).

BACK-LIT MIRROR WITH WALL GLOW ONLY

Maximizing the ethereal light radiating from the sides of the mirror, this style features an open chassis with wall glow only, emitting light from LEDs installed with diffusers on the outside of the chassis for a finished side view. This style is designed to provide beautiful ambient light that appears to be glowing from within the wall. The mirrors with wall glow only are the Luna™ (page 66) and the Serenity™ (page 74).

FRONT-LIT MIRRORS WITH DIRECTIONAL LIGHTING

Unlike our back-lit mirrors, these front-lit mirrors feature diffused LED lighting positioned in front of the mirror glass, creating a striking border of light along the inside edge of the frame. With a sleek profile and angled directional lighting, these mirrors provide brilliant facial illumination, creating fewer shadows and an impressively sharp reflection. The Brilliance™ (page 50) and Eminence™ (page 56) include both dimmable front lighting and dimmable ambient wall glow. The Radiance™ (page 70) includes dimmable front lighting only.

Mirror Technology

From mirrors made specifically for bathrooms, to vanishing mirrors engineered to optimize mirror technology, our mirror transcends all expectations.

NOT ALL MIRRORS ARE CREATED EQUAL

The mirror is normally the first thing to fail on a lighted mirror, so it's the most important thing to consider. Our mirrors are specifically created to protect against heat, humidity, corrosion, and scratching to give you years of beautiful, clear, smooth, accurate, and non-distorted reflection. At Electric Mirror, we conduct rigorous, ongoing testing to ensure this superior quality:

- Acid resistance test: Our mirror is submerged and soaked in a strong acid solution for 20 hours.
- Alkaline resistance test: Our mirror is submerged and soaked in strong alkaline solution for 20 hours.
- External CASS testing: Our mirror is subjected to four complete testing cycles totaling 480 hours via an independent third-party lab.
- Internal CASS testing: Electric Mirror conducts its own CASS chamber testing in house.
- Adhesives test: The adhesives we use are tested on our mirror in high temperature and high moisture conditions to ensure longevity.
- Mechanical shear test: Our mirror hangers are subjected to a 500 lbs. per square inch mechanical shear test to ensure they never separate from the mirror.

OmegaMirror™ from Electric Mirror

OMEGAMIRROR

OmegaMirror™, the only mirror engineered specifically for the bathroom, will help retain the beauty and extend the life of your mirror. OmegaMirror™ technology resists unsightly clouding, desilvering and black-spot corrosion caused by the high humidity and poor ventilation common in most bathrooms. OmegaMirror™ is a premium feature that comes standard at no additional cost on all lighted mirrors, mirrored cabinets, wardrobe mirrors, and fog-free mirrors from Electric Mirror.

IRIS

Iris® mirror, used on our Eclipse™ TV Cover (page 144), offers stunning quality and an exceptional viewing experience. The display virtually vanishes when off, leaving only a subtle, faint outline of the display perimeter that may be noticeable up close. Ideal for bedrooms and living rooms, it's slightly darker than a typical mirror, and is best used with high-brightness TVs with greater than 2000 nits.

SPECTRUM

Best suited for bathrooms that are not all white or overly bright, Spectrum™ is excellent for makeup application and preparing for the day. Spectrum mirrors have a highly reflective mirror surface and provide a good TV image when turned on. When the TV is off, the screen area is camouflaged, leaving only a light gray image where the TV is located. For maximum TV clarity in all-white, or brightly lit bathrooms, see our B-Series technology below.

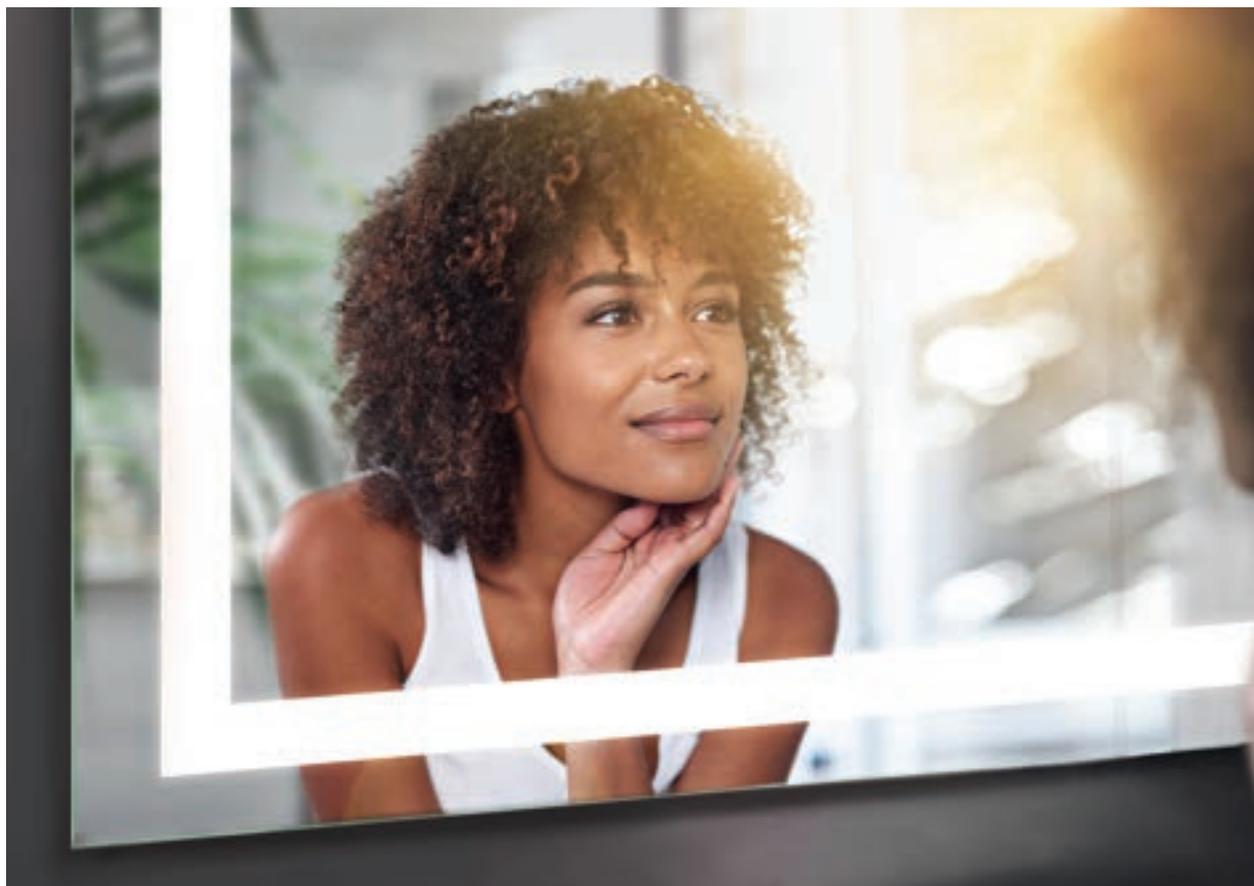

B-SERIES

Ideal for all-white or brightly colored bathrooms, B-Series™ is a custom option that provides a crisp, clear viewing experience with reduced glare. B-Series mirrors have a highly reflective mirror surface everywhere except the TV viewing area. When the TV is off, the TV screen area is black. When the TV is on, the screen area displays an impressively bright TV image.

LED Lighting Technology

Understanding some of the finer points of LED lighting will help you recognize why our LEDs lead the industry.

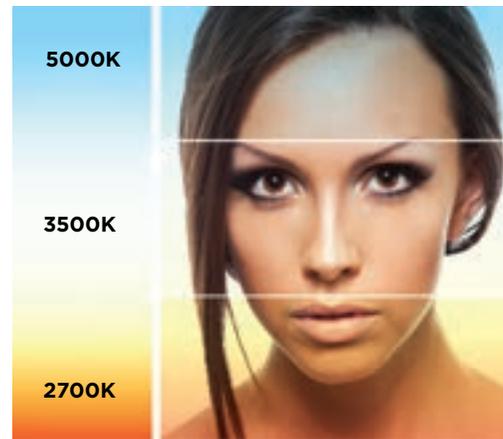

THE HIGHEST LED STANDARD

Our products feature LED light engines that raise the bar on quality, color, and brightness. With a longer effective lifespan, lower energy consumption, and less environmental impact, they offer beautiful, natural looking light with superior performance.

THE BEST COLOR TEMPERATURE

Color temperature, measured on a Kelvin (K) scale, is often an aesthetic choice. Since we know a bright, warm color is generally most flattering, we designed our mirrors with the standard light temperature of 3000K. If you want the ability to alternate between a range of LED colors, we offer our exclusive Ava™ technology (page 168), available in many of our lighted mirror products.

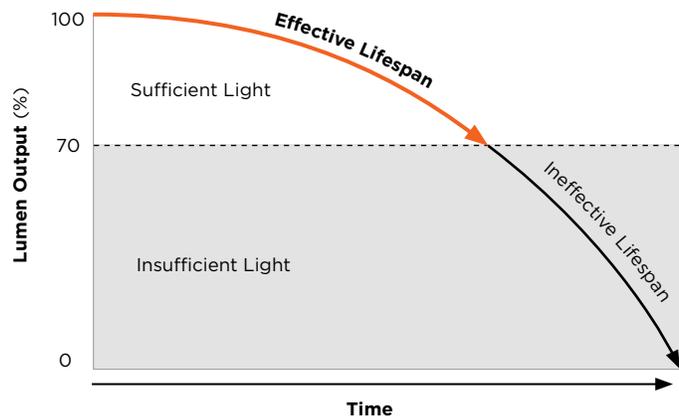

THE MOST ACCURATE LIGHT

The Color Rendering Index (CRI) is a measurement scale of how accurately a light source reflects true colors, and is expressed in a range from 0 to 100. A higher CRI indicates a more accurate color reflection. Ours boast CRIs of 90+, creating the most natural-looking color available.

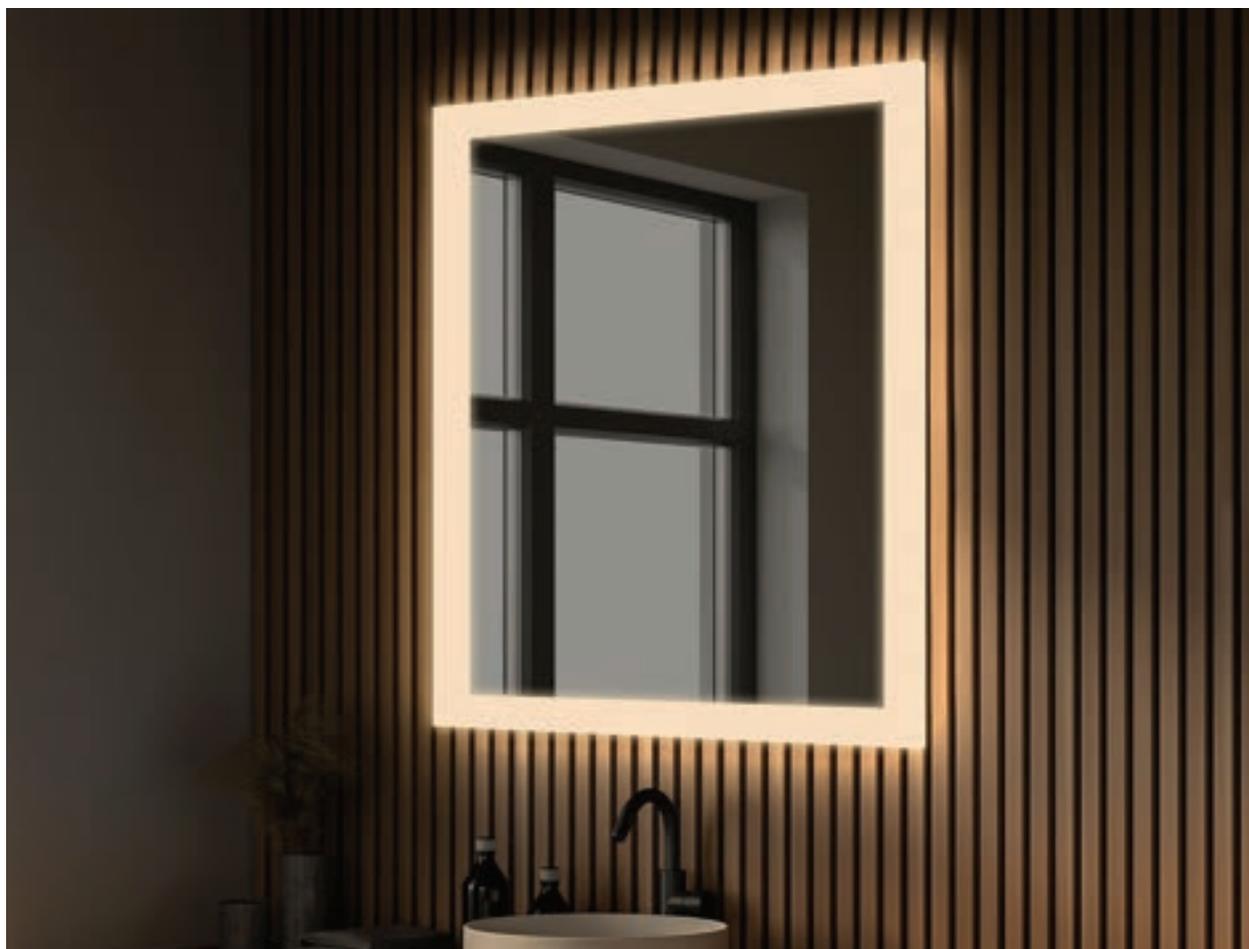

THE GREATEST EFFECTIVE ILLUMINATION

Since lumen output diminishes over time, and anything less than 70% is considered insufficient, it's important to choose lighted mirrors with dependable, long-lasting LEDs. We select LEDs with a minimum calculated L_{70} 50,000-hour lifespan, easily providing many years of the best light without compromise.

Dimming Technology

Control your mirror's brightness and enhance your room ambiance with advanced dimming technology, available in lighted mirrors, mirrored cabinets, and wardrobe mirrors.

DIMMABLE DRIVERS

Our lighted mirrors, mirrored cabinets, and wardrobe mirrors come standard with dimmable LED drivers or dimmable controls that allow you to adjust the lighting level to your preference. Start your day off energized with full brightness, relax and wind down in the evening with a more subdued lighting ambiance, or choose anything in between.

DIMMING CONTROLS

Depending on the individual product, the LEDs can be dimmed by a forward-phase dimming switch, or one of our on-mirror dimming technologies, such as Keen™, Ava™, and Touch Dimming.

KEEN DIMMING

Keen™ provides you with a rich, intelligent, and eco-friendly dimming experience with zero hassle. Read the complete story on Keen's features and benefits (page 166).

AVA DIMMING

Ava™ offers dimming that's similar to Keen™, plus the added ability to change the color of the lighting from warm to cool—perfect for makeup application. Learn more about Ava™ (page 168).

TOUCH DIMMING

The Brilliance™ (page 50) and Eminence™ (page 56) offer dimming that's similar to Keen, with the added ability to dim the wall glow separately from the front lighting.

DIMMING OPTIONS FOR LIGHTED MIRRORS AND WARDROBE MIRRORS

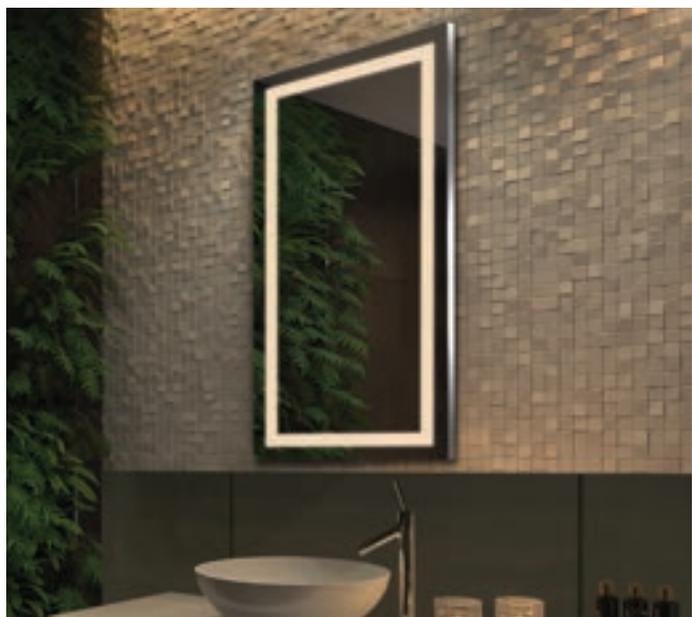

The standard dimming technology for these products is forward-phase dimming, which requires no special wiring other than a hot, neutral, and ground 120V/240V hardwire connection. The recommended forward-phase dimming switch is the Leviton IPL06-10Z (not included).

For simple, elegant touch-dimming in lighted mirrors, consider Ava™—which also includes color-tuning—available with the Aria™ (page 44), Bela™ (page 48), Eternity™ (page 58), Fusion™ (page 62), and Integrity™ (page 64). For dimming without color-tuning, choose Keen™, available with the Eyla™ (page 60) and Silhouette™ (page 76), or Touch Dimming, available with the Brilliance™ (page 50) and Eminence™ (page 56).

DIMMING OPTIONS FOR MIRRORING CABINETS

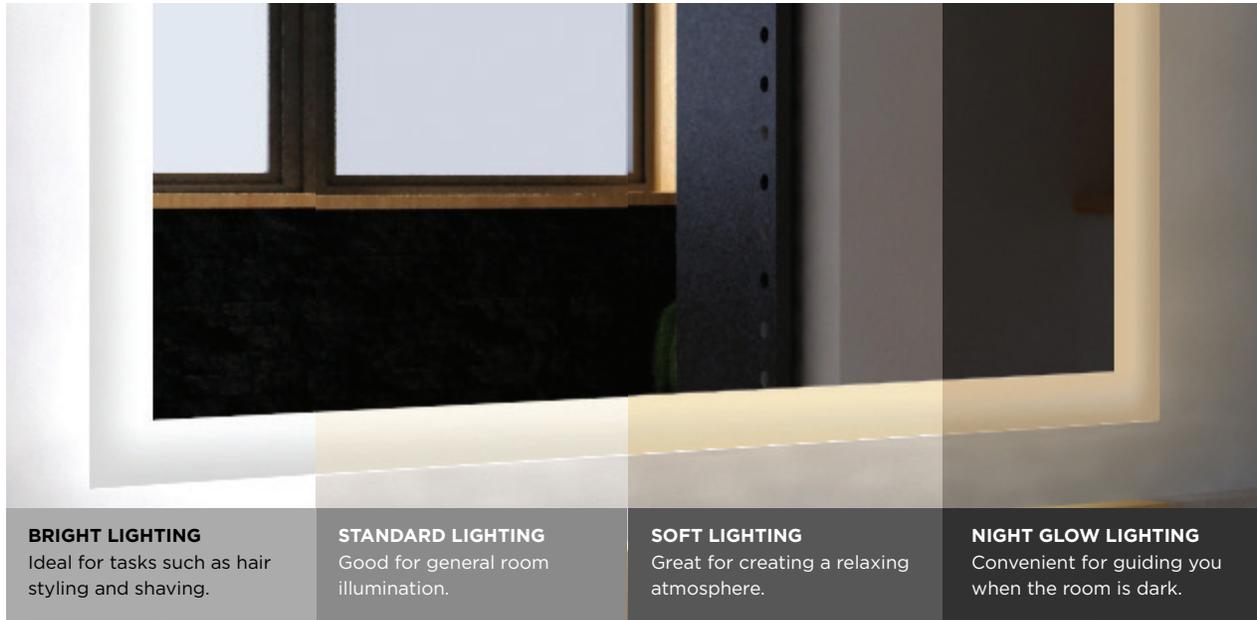

The standard dimming control for the Ambiance™ Mirrored Cabinet (page 96) is forward-phase dimming. The recommended forward-phase dimming switch is the Leviton IPL06-10Z or Lutron DVCL-153P (not included).

For dimming that is seamlessly integrated into the mirrored cabinet, consider the Ascension™ (page 98), which comes standard with Touch Dimming, and requires no additional wiring other than a hot, neutral, and ground hardwire connection.

Keen™ Technology

Bring the Eyla™ and Silhouette™ Lighted Mirrors to life with the beauty and functionality of Keen™, which offers dimming, eco-friendly technology, and Night Glow with a touch.

THE RICHEST DIMMING EXPERIENCE

Keen's thoughtful design provides a complete range of light levels to satisfy your every lighting need. Plus, the innovative engineering makes interacting with Keen a luxurious experience:

- The intuitive interface is seamlessly integrated into the mirror, offering a sleek and beautiful design.
- Lighting initiates at full brightness and dims down and back up by touching and holding the Keen™ icon.
- Night Glow mode provides just enough lighting to safely guide you when the room is dark, and the Eye-Sensitivity Adjustment technology automatically reduces the light level as your eyes adjust to low light.

Keen is available as an upgrade in the Eyla™ lighted mirror (page 60) and Silhouette™ lighted mirror (page 76). Keen™ must be connected to earth ground in accordance with NEC code 250.20 (B). Improper ground can result in irregular function of the unit.

THE SMARTEST ECO-FRIENDLY TECHNOLOGY

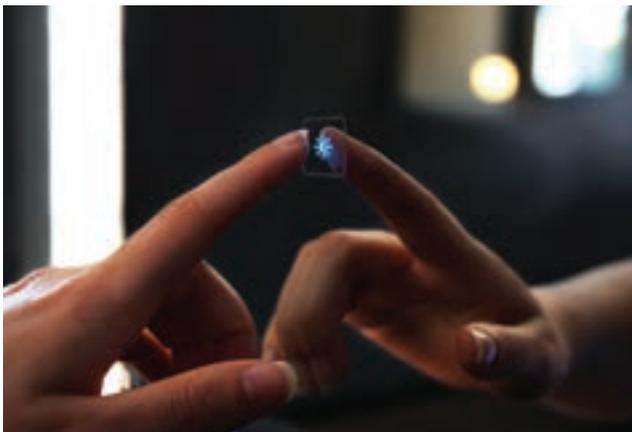

The intelligent sensor in Keen™ supports your commitment to the environment:

- It dims your lighted mirror after an hour of non-use, so you're helping the environment even when you forget to turn the lights down.
- Energy consumption is reduced on average by 60%, making a big impact automatically.

THE SIMPLEST SET UP

Keen™ requires two wires plus a ground wire from an on/off switch to the mirror. You can also use a two-wire plus ground wire unswitched connection to the mirror to control the lights directly through the on-mirror interface. Keen™ must be connected to earth ground in accordance with NEC code 250.20 (B). Improper ground can result in irregular function of the unit.

THE EASIEST OPERATION

Tap to cycle through On, Night Glow, and Off. Night Glow starts at 1.5% and slowly dims to 0.5% over 20 minutes.

Touch and hold to gradually change light between 100% and 10% brightness.

After one hour of non-use, Keen's Energy Save Mode automatically dims the lights to 10% brightness.

Ava™ Technology

Ava™ takes task lighting to a beautiful new level, letting you change the LED light color and brightness level to make precise makeup application possible.

2,700K

Perfect for a sunset cruise, an intimate evening dinner, or a night at the theater.

3,500K

Excellent for an important boardroom meeting, a busy day on campus, or a quick get-together with friends for lunch.

5,000K

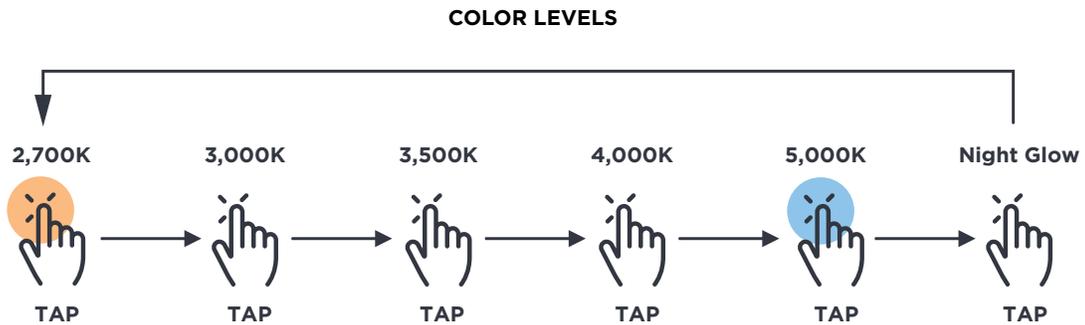

Ideal for a leisurely day at the pool, 18 holes at the local country club, or a relaxing cruise.

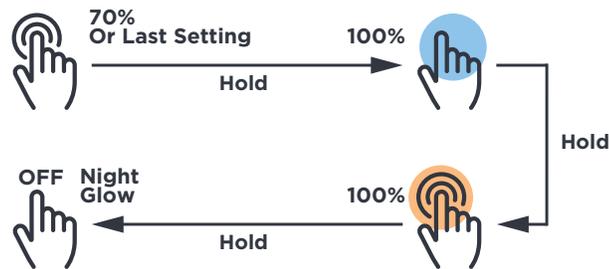

THE IDEAL SETTINGS FOR YOUR SETTING

Ava™ gives you the confidence to look your best in any environment. The tunable LED lights give you the freedom to select the ideal color setting for any occasion: outdoors, indoors, or evening. And with integrated dimming that allows you to adjust the brightness of the lights, Ava™ can create almost any lighting condition you can imagine. Ava™ is available as an upgrade in the Aria™ (page 44), Bela™ (page 48), Eternity™ (page 58), Fusion™ (page 62), and Integrity™ (page 64) lighted mirrors.

The Beauty of Simple Interaction

Mirror first turns on at 2,700K at full brightness. Tap to cycle through each color temperature level, Night Glow and Off. Hold to immediately turn on Night Glow. Night Glow starts at 1.5% and slowly dims to 0.5% over 20 minutes.

BRIGHTNESS

At each color level shown above, tap and hold to increase the brightness from 10% to 100%.

After one hour of non-use, Ava's Energy Save Mode automatically dims the lights to 10% brightness.

THE BEAUTY OF SIMPLE SET UP

Ava™ requires two wires plus a ground wire from an on/off switch to the mirror. You can also use a two-wire plus ground wire unswitched connection to the mirror to control the lights directly through the on-mirror interface. Ava™ must be connected to earth ground in accordance with NEC code 250.20 (B). Improper ground can result in irregular function of the unit.

Shipping and Handling

Mirrors are one of the most fragile products in the world to ship. From the way the mirror is packaged to the delivery carriers we choose, we're committed to ensuring the mirror arrives safely and in perfect condition.

SHIPPING PRICING

NOTE: Shipping prices are for shipments to the contiguous U.S. only. For shipments to Alaska, Hawaii, and countries outside the U.S., contact Electric Mirror for a freight estimate. To determine the contiguous U.S. shipping cost, find the specified sizes for each product in the Price Guide Index (pages 172-177). The shipping and handling fee (S&H) listed is for a quantity of one. For two or more extra small and/or small mirrors, add the individual shipping and handling fees together. For two medium and/or large mirrors shipped to the contiguous U.S., freight is a flat \$250. For three or more medium and/or large mirrors shipped to the contiguous U.S., freight is free (see below). Note: combo shipping pricing does not apply to mirrored cabinets.

	XS <i>Extra Small</i>	S <i>Small</i>	M <i>Medium</i>	L <i>Large</i>
Contiguous U.S.	\$12	\$70	\$140	\$210

FREE FREIGHT ALLOWED

For deliveries to the continental U.S., Free Freight is Allowed (FFA) on orders \$2,500 or greater of stock product (excluding custom mirrors, mirror TV's, makeup mirrors, and mirrors over 42" in height dimension). Electric Mirror reserves the right of final discretion on all orders with Free Freight Allowed. For shipments to Canada with three or more mirrors, contact Electric Mirror for a freight estimate.

DROP SHIP FEE

The shipping prices listed for each product assume shipping to a dealer's loading dock. To ship to a different address, such as direct to a residence, a drop ship fee must be added for each shipment. For a drop shipment with multiple products, a single fee for the largest size will apply. The drop ship fee will still apply for orders that qualify for FFA.

XS <i>Extra Small</i>	S <i>Small</i>	M <i>Medium</i>	L <i>Large</i>
+\$10	+\$55	+\$125	+\$175

SHIPPING DAMAGE POLICY

We recommend the packaging and product is thoroughly inspected as soon as it arrives at the first destination: either the dealer (in most cases), or the residence (if drop shipping was added). If any damage has occurred during shipping, it must be reported within 15 business days of receipt of shipment. You must take photos of the damaged packaging and product; do not install the product before taking photos. Then, contact Customer Support at residential@electricmirror.com or 888.368.1285 and a Claims Information Form (CIF) will be provided. The CIF must be completed and emailed back within three business days; failure to do so will result in forfeiture of any claim.

If a third-party carrier was used for shipping, please direct freight claims submission or questions to the third-party carrier.

Terms and Conditions

All pricing, terms, and conditions apply to the most current Electric Mirror Retail Price Guide. Pricing and product availability are subject to change without notice. Updated price lists supersede all other price lists.

LEAD TIME

The typical lead time for standard in-stock items is one week*, or four to six weeks for standard items not in stock. The lead time for custom items is eight to ten weeks.

PRODUCT REPRESENTATION

Some product images in this book may not depict an exact representation of the product's design, size, or lighting output.

SHIPPING

FOB Destination. See page 178 for Shipping and Handling Information. Freight rates are subject to change without notice. Electric Mirror reserves the right to determine the size category applicable to any particular order.

RETURN POLICY

All stock products that have been kept in the original packaging and are in undamaged and saleable condition may be returned to Electric Mirror within 90 days of delivery for a credit based on the original invoice, less a 25% restocking fee and the original freight costs. All returns must first be approved by Electric Mirror and include a Return Material Authorization number (RMA#) on the return package to qualify for restocking credits. All returns are subject to Electric Mirror's discretion based on context and best practice. Make-up Mirrors, Medicine Cabinets, and Custom Mirrors must be in original, unopened box to be eligible. For questions, contact Customer Support at residential@electricmirror.com or 888.368.1285.

STORAGE CHARGE

Storage charges will be assessed on all products that are ready to ship but are being held at your request.

15-DAY SHIPPING DAMAGE POLICY

Electric Mirror will replace any of its products damaged in transit if notified within 15 business days of receiving shipment if shipment was through one of Electric Mirror's own carriers. Notification of damaged goods must include a description of the damaged goods, as well as pictures that show the damage in the packaging. Thoroughly inspect the packaging and product as soon as it arrives. You must not install the product before taking photos of the damage. See page 178 for additional information.

WARRANTY

For complete warranty terms, conditions, and details, visit: electricmirror.com/warranty.

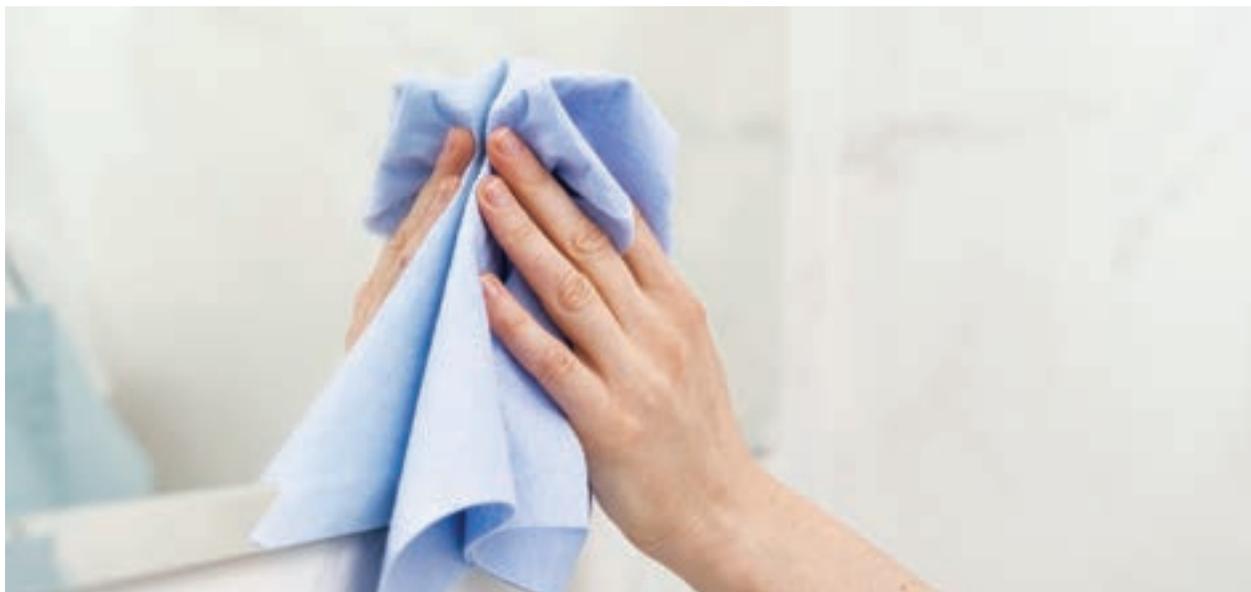

CLAIMS

Claims under the Electric Mirror warranty should be made through the dealer. After the dealer contacts Electric Mirror and receives an RMA#, you must promptly return the product, at your expense, to Electric Mirror after receiving instructions as to when and where to ship the product.

*High demand may lead to temporary delays of in-stock items.

Mirror Cleaning and Care

Combine these mirror cleaning and care tips with Electric Mirror's OmegaMirror™ to ensure optimal performance from your long-lasting mirror.

USE THE RIGHT CLEANER.

The best cleaner for mirrors is clean, warm water used with a soft, lint-free cloth. If using a commercial glass or mirror cleaner, be sure to use one that does not contain ammonia or vinegar, as that can cause corrosion or desilvering. Do not use Windex.

SPRAY THE CLOTH, NOT THE MIRROR.

Avoid spraying water or cleaner directly onto the mirror. Spraying can cause liquid to pool at the bottom edge of the mirror, increasing the chance the mirror could corrode. Instead, apply the cleaner to a soft cloth and then wipe the mirror.

DRY THE MIRROR COMPLETELY.

Be sure to dry all joints and edges thoroughly and be careful not to allow water or cleaner to pool along the edges of the mirror. Wet edges over time is the number one cause for corrosion and desilvering at the lower edge of a mirror.

BE CAREFUL WITH THE EDGES OF THE MIRROR.

Because the mirror is fragile and can chip at the corner, be careful not to touch the edges or corners of the mirror against a hard surface such as tile. Use the provided corner protectors when setting the mirror down before and during installation.

PROTECT THE MIRROR'S CENTER SURFACE AREA.

Do not rest the mirror on an abrasive, or uneven surface. Place the mirror on a soft surface such as carpet or a towel before and during installation.

Please be advised that failure to comply with these instructions may result in damage to the mirror that will void the warranty.
